

## Quality factors

College [Tirumala Engineering College] has many quality factors which are

### 1. Accreditation & Affiliations:

The affiliations and accreditation of any engineering college must be properly checked before proceeding to get an admission in it. The main accreditation authority in India for engineering and technical colleges is **All India Council for Technical Education (AICTE)** which gives accreditation to courses that can be run by the institute. Tirumala Engineering college Accredited by NBAs and NAAC

Tirumala Engineering college is affiliated JNTUK, Kakinada and the degrees provided by the institute are of that university.

### 2. Placements:

Placements by the Institute after completion of the degree course is one of the most important quality factors to be checked by an individual before taking admission. All Placement details are placed in the official website [www.tecnrt.org](http://www.tecnrt.org), social networking sites and media and news channel websites. It depends on factors like faculty, college rank, facilities provided by the college to its students, past performance of the students in companies they were placed in and many more factors. 230 students are placed in well reputed companies like TCS, Wipro, Accenture etc.

### 3. Internship and Job Opportunities

The biggest parameter to judge how good a college is by the placement service provided by the college. The reason is simple a company will hire only those who are competent enough to provide something valuable to the organization. If the students at a college are hired readily than it indicates that they are competent for the profile that companies are looking for.

### 4. Student-Faculty Ratio

This is an important feature that determines how well the academics are conveyed by the college or how well students are trained. In a large classroom, it is difficult, if not impossible, to look after every student as to how he or she is performing. The smaller the difference in student-faculty ratio the better will be the performance of students there.

### 5. Laboratories and Instruments

There are several education fields where it is essential to have good laboratories and instruments to understand what is being taught theoretically in the classrooms. For example, for all the engineering programs it is impossible to have a complete understanding of the subject matter without practical exposure. When you search for a college, so make sure to check out this factor.

### 6. Research Activities

The quality of the education imparted at a college is also exhibited by the number of patents that have been filed by the college. This directly correlates to the number of research activities that are being conducted at the college or how good the laboratories of that college are. Do keep this factor in mind when you search for a good college.

## **7.Academic Support**

This relates to the amount of effort the college is making to ensure its students are placed in a good company during campus placements. A good college makes an effort in preparing students to face interviews and how they can present themselves in the best possible manner. At Tirumala Engineering College every effort is made to fine-tune the placement service.

## **7.Exchange Program**

When you search for a good college to study in, do make sure that the college has international tie-ups to provide international exposure to its students through a student exchange program or credit transfer program. Such an arrangement is very essential as it provides inter-cultural exposure to students.

## **8.Extra-curricular activities**

This factor may look not so important, but the overall development of a person depends heavily on it. Being good only in your academics is just not enough, as many companies' lot of weightage to how well developed their prospective employee is. Find out how often the college organizes various types of competitions such as drawing, sketching, painting, etc.

## **9.Industrial Visits**

A good way to make students job-ready is by making them aware of the working of various organizations. As a student, you should find out how many tie-ups a college has with various industries. Tirumala Engineering College has tie-ups with numerous companies, and it makes sure that TEC go for regular industrial visits.

## **10.Overall Infrastructure and Facilities**

Medical dispensary, or the quality of the food that is being prepared at the canteen. You will be spending a good three to four years at the college so these things should also be taken into consideration.

## **11.Hostels**

It is the last point mentioned in this article, but the value of this factor is as good as the first one. Check the rooms in the hostel, and find out how big they are, or whether they are airy or not, and is there provision for regular sunlight. In case the college is far away from home, and you will have to stay at the hostel then this factor is worth checking out for and has an important role to play.

These are not the only things that one needs to check before enrolling for a higher education program at a college. But these factors are a must to watch out for, and in case any of these factors is not up to the mark,

then it is better to consider another option. The college has many other plus points, which provides students not only the best of academic input but also keeps them entertained and refreshed. In case you are looking for a good college in Narasaraopet region is at the number one spot and worth considering as a strong option.

Pursuing a higher education degree is not a child's play, right from the time when you search for the right college to finally submitting the college fees there are so many things to think of and to judge. The biggest decision to make is which college to take admission in, what are the features that we should look for to judge the credibility of a college or the type of education that it will provide. It is not only a huge cost that is at stake, but it is the matter of your life. These are precious years of your life, and you just cannot let it go waste. In this article we look at some of the features that a college should have to be a good college, or these can be your parameters to judge as to how good a college is or not. so Tirumala Engineering college fulfils all quality parameters for choosing best college in the Guntur region

## **12.Reputation:**

The reputation of an engineering college is a vital factor which helps in clear decision making. It refers to the comments posted by the students, ex-students (alumni), faculties and other people who have had personal or professional relations with the Institute concerned on the social media channels like LinkedIn, Facebook, and Twitter etc.

## **13.Quality and Number of full-time Faculties:**

It is a very important factor which tells what quality of education is imparted and provided by the Institute to their students. There must be a good ratio of full-time faculties to the number of students enrolled. This is generally defined in terms of student to faculty ratio. It is basically the number of faculties per student, like 20:1 state that for every 20 students there is 1 faculty. A good institute needs to have a low Student to faculty ratio. Quality of faculties is also necessary, which can be evaluated on the grounds of teaching experience, Education qualification, degrees, and accolades etc. Better faculties help the individuals in shaping their future in a better way.

## **14.Tie-Ups/Study Abroad Programs/Internships/scholarships:**

This is another parameter which automatically enhances the reputation of any engineering college. A good number of university tie-ups, company tie-ups, and study abroad program ensure a better exposure of a candidate, whereas internships and scholarships ensure better participation of a candidate. This parameter should also be checked before admission.

## **15.Alumni Network:**

Alumni network is one of the important factors that should be looked on while selecting an Engineering College for admission. Alumni network can be considered as the assets and achievements of the engineering

institute. Alumni in good positions in private, public or government organizations represent the better studies and placement services at the institute. A good alumni network supports the institute and its students at all levels of professional life.
